SUBJECT: GENERAL—

SPECIFIC—

Request for Additional Information on U.S. Service
Underwater Delay Devices

25X1

25X1

1. The group has seen a reference to the following U.S. Service Underwater Delay Devices:

25X1

- a. Firing Device, Demolition Mk 12.
- b. Firing Device, Demolition Mk 15, Model O.
- c. Demolition Firing Device, Type XT-1A.
- d. Demolition Firing Device, Type XT-2A.

They have not been able to find any details on these devices except that all are clockwork delays and that item a gives a delay of 5/92 seconds, item b a delay of 15 minutes/11½ hours and item c a delay of 2 minutes/60 minutes.

2. Accordingly, they have asked if we can make available to them as much information as possible on the function, design and specifications of these delays as well as samples for their use and retention if such are available. The writer believes that one or more of these devices were held by the research group in June 1952 in connection with research on RDP-24, the clockwork firing device.
